Atkins Nuclear Secured Acquisition History and Capabilities ETEBA Member Meeting

Pat Hopper, PMP

JANUARY 25, 2018

Save the Date:

What's the story of the merger/acquisition?

ATKINS

Member of the SNC-Lavalin Group

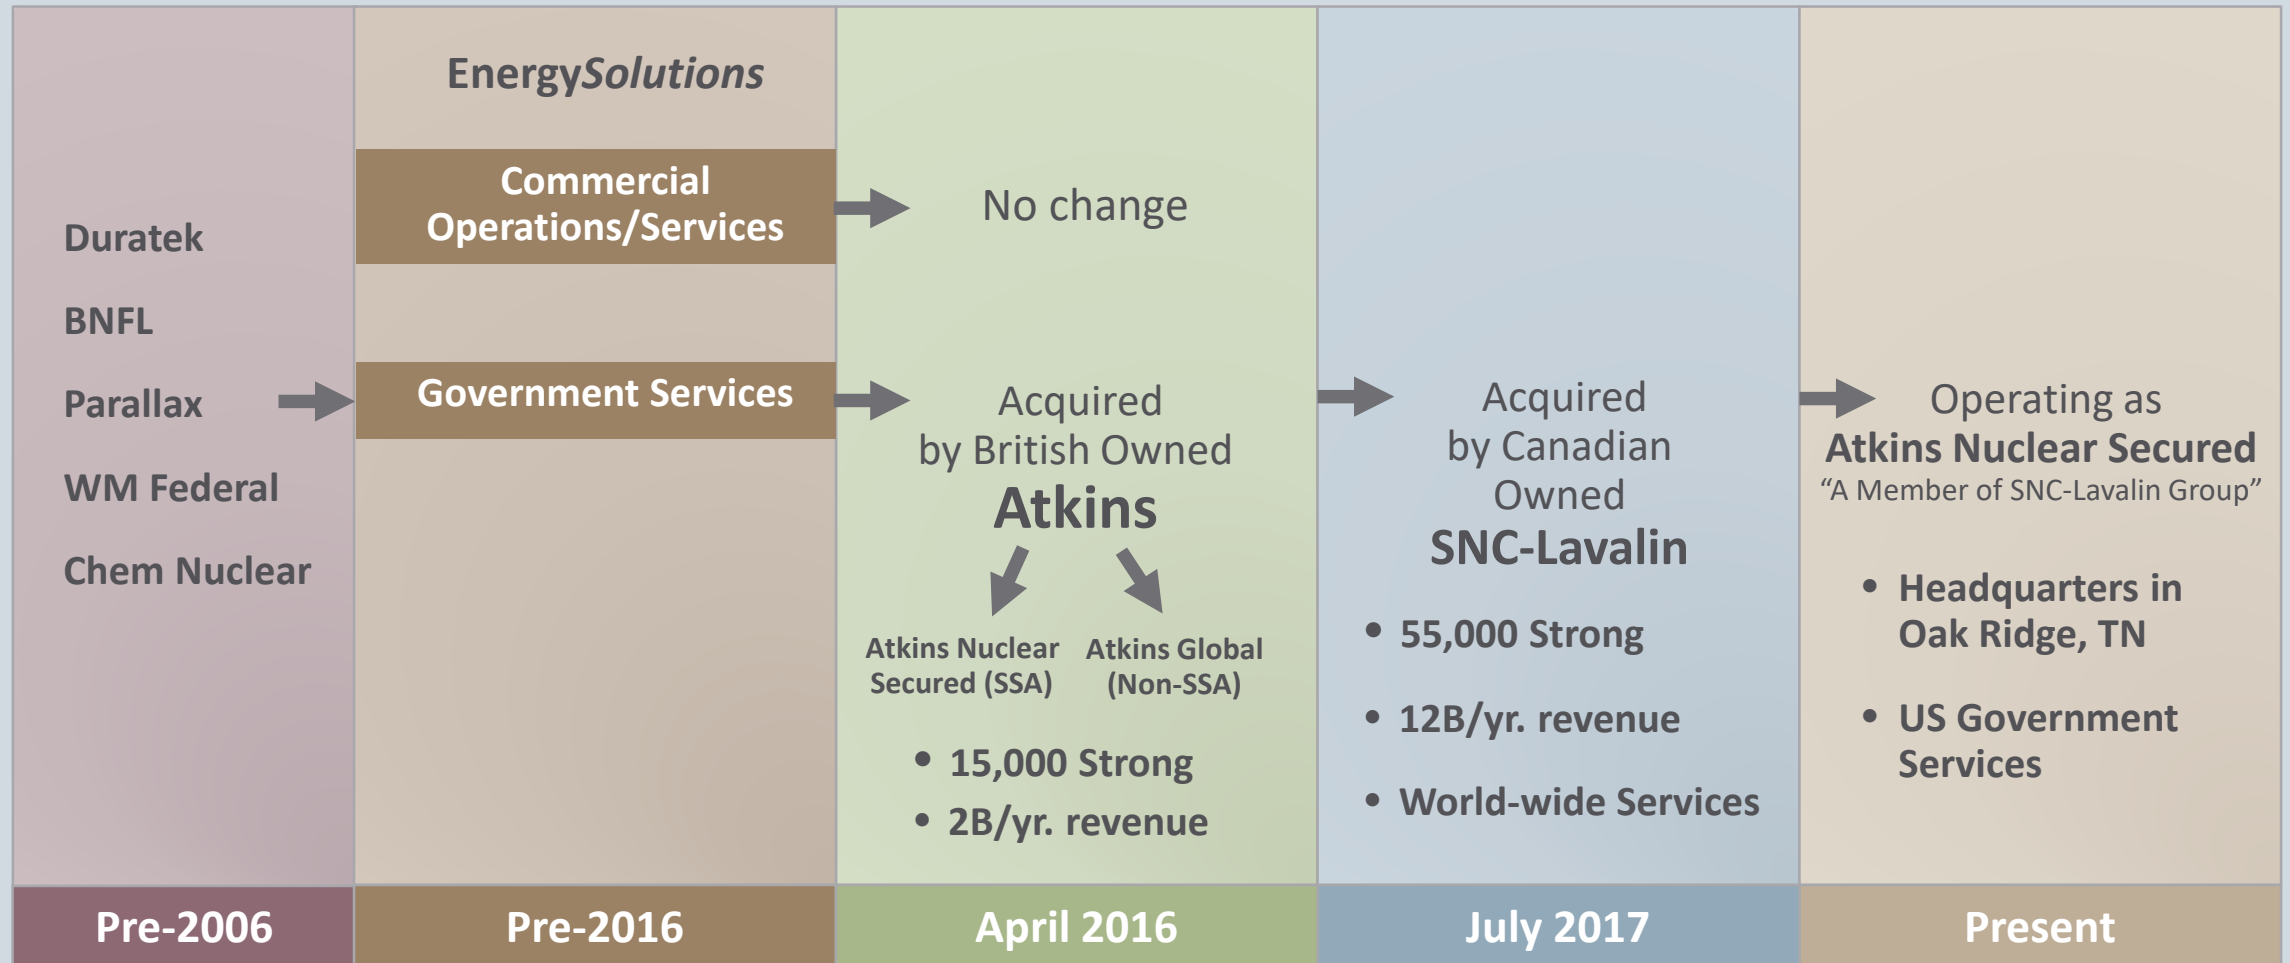

- ❑ Atkins is an international project management and engineering services firm established in 1938
- ❑ Acquired by SNC-Lavalin in July 2017; resulting in a 55,000 employee worldwide Engineering, Procurement, Construction and Environmental Services firm with annual revenues ~\$10B
- ❑ Acquisition also includes the past performance, contracts and intellectual property associated with predecessors EnergySolutions Government Services, BNFL Americas, Duratek, WM Federal Services, Chem Nuclear and Parallax
- ❑ Now operating as Atkins – A member of the SNC-Lavalin Group
- ❑ Key nuclear projects include management and operation of Hanford Tank Operations project, DUF6 Conversion Plants, SRS Salt waste Processing Facility, INL AMWTF and Canadian Nuclear Laboratories; ITER fusion project, UK NDA cleanup projects, and nuclear new-build involving in-house CANDU platform and other technologies such as AP-1000 and small modular reactors
- ❑ Significant domestic & international experience in design, engineering, construction management, and project oversight for new construction (infrastructure, renewables, skyscrapers, airports, industrial complexes, etc.)

What's the story of the merger/acquisition?

What are the intended markets in which you intend to sell?

- Atkins Nuclear Secured; US Government focus (primarily DOE, DOD, USACE, NASA, FEMA and EPA)
- D&D and Environmental Services
- Facility Management (M&O's)
- Engineering, Construction and Technologies
- Consulting e.g. Nuclear Safety and QA

Capabilities

ATKINS

Member of the SNC-Lavalin Group

Large Project Management and Environmental Services

- Project Management
- D&D
- Remediation
- Waste Management
- Nuclear Safety
- Radiological Services
- Regulatory Affairs
- Site Closure and LTS

Facility Management and Operations

- Management and operation of DOE facilities (both Operating and Closure sites)
- Nuclear Operations / Conduct of Operations
- Nuclear safety / Nuclear criticality safety
- Plant startup & commissioning
- Plant operations (GoCo)
- Training/readiness
- Enabling technologies
- Facility maintenance strategies

Engineering, Procurement, Construction, and Commissioning

- Conceptual through detailed design
- Process engineering
- Cold and hot functional testing
- Landfill design, build, and operate
- Applied technology
- Niche support safety, fire protection, licensing, etc.
- Product & equipment fabrication and supply

Technology Development and Consulting Services

- Centered around high level expertise in niche fields:
 - Nuclear Facility Safety
 - Nuclear Criticality Safety
 - Quality Assurance based on NQA-1
 - Performance Assurance
 - Emergency Management
- Complemented by staff augmentation in engineering, project management, and other professional services
- Widely dispersed with presence or history at most DOE sites
