JANUARY 25, 2018

Save the Date:

Transformation (History)

Creating a global service industry leader

wood.

The launch of Wood represents a momentous opportunity for all who have been part of the legacy organizations. Both Wood Group and Amec Foster Wheeler (AmecFW) have been progressing along a transformation agenda for a number of years.

For Wood Group this journey gained momentum in 2015 with the decision to restructure Wood Group around its service offering in July 2016. The acquisition of Foster Wheeler in November 2014 and subsequent Transformation Program have been key stages in AmecFW's development.

The possibilities of creating something new that was more competitive and compelling than either legacy organizations alone led to the decision to form Wood from the raw ingredients of both companies.

Combining the strengths of these two businesses mean we have enhanced capability and can draw on enhanced efficiencies in supply chain, resourcing, upmanning, project execution and research and development, a stronger partner for our customers.

Great combination

outstanding
talent

enhanced
capability

greater
scale

Intended Markets

 <p>Clean Energy</p>	 <p>Chemical</p>	 <p>Refining</p>
 <p>Environment and Infrastructure</p>	 <p>Manufacturing</p>	 <p>Marine and Defence</p>
 <p>Mining and Minerals</p>	 <p>Nuclear, Power and Process</p>	 <p>Oil & Gas</p>

Capabilities

Environmental Remediation

- Due diligence
- Site investigations
- Data management
- Remedial design & evaluation
- Remedial construction management
- Start up, monitoring and maintenance
- Decommissioning & Demolition
- Brownfield redevelopment
- Human health and ecological risk
- Fate & transport groundwater modelling
- Natural resource damages support

Public Infrastructure

- Feasibility studies
- Road and bridge design
- Rail infrastructure design
- Port and marine design
- Stormwater design services
- Green infrastructure design
- Site development
- Site civil and grading
- Municipal and industrial water treatment
- Landfills
- Construction engineering, oversight and inspection (CE&I)

Permitting and Compliance Services (Environmental, Health & Safety)

- Air, water and waste permitting
- Testing and verification
- Regulatory compliance reporting
- EHS compliance audits
- Regulatory agency negotiation
- Expert testimony

Geotechnical and Materials

- Geotechnical testing, analysis and modelling
- Ground improvement studies and design
- Retaining walls, slurry walls, mechanically-stabilized earth, deep soil mixing
- Seismic engineering
- Dams, levees, and reservoirs
- Tailings dams design and Construction Quality Assurance (CQA)
- Construction Materials Testing
- Construction Engineering & Inspections
- Materials failure analysis

Environmental Sciences

- Environmental impact studies
- Natural resource management
- Flood studies and mapping
- GIS and environmental mapping
- Cultural and social resources assessment
- Aquatic ecology
- Hydrogeology and hydrology
- Meteorological and oceanographic services
- Hazard mitigation and emergency planning/management
- Industrial hygiene

Facility Operations

- Facility Condition Assessments
- Pharmaceutical and R&D facility design
- Fuelling systems
- Industrial Water/Wastewater
- Design/Build facility systems (fire protection, cooling water, HVAC, central utilities)
- Start-up, commissioning, qualification
- Operations and Maintenance
- Cost estimating and project controls
- Subcontractor and supply chain management/vendor and contractor selection review

Let's get down to business

COMBINING TWO GREAT COMPANIES – CREATING ONE LEADING BUSINESS

The combined strengths of Wood Group and Amec Foster Wheeler create a new leading technical services company of outstanding global scale and enhanced capability.

Wood is our single overarching brand, but at this time our legacy name will continue to be used for projects and contractual purposes.

Same

- Still a values based company with **safety** as our top priority
- Still a **people** organization, caring about each other
- Still responsive to the needs of our **customers**

Different

- New structure to accommodate both organizations
- New leadership reflecting the combined experience from our two businesses
- New markets and services
- New identity

US Small Business Program

wood.

We have an established Small Business Program to coordinate and oversee all small business activities throughout the company. Providing assistance to small businesses is part of the corporate culture. As a result, we are able to collaborate on innovative ideas, deliver creative solutions and assist small businesses in growth.

VISION

We recognize that by establishing strategic partnerships with all categories of Small Business, we can achieve our vision by enhancing our capabilities, serving our customers better and meeting or exceeding our contractual obligations. Positive working relationships between small and large businesses are critical to the development of communities and the people that reside in those communities.

MISSION

The mission of our Small Business Program is to continually seek and expand relationships with small businesses of all socioeconomic categories. We want to increase our small business utilization each year, continue to grow our mentor protégé relationships, develop and strengthen our strategic relationships with small businesses that fulfill niche services, and increase awareness of SBA rules

Mentor/Protégé Programs

We have been recognized with various awards for our mentoring efforts. These programs allow small businesses to compete more successfully for federal contracts, expand their capabilities, reach new clients and broaden geographic reach.

Participation in Numerous Mentor/Protégé Programs sponsored by

- Air Force
- Army
- Navy
- GSA
- USAID
- SBA

Provided Support with

- Financial audits
- Human Resources
- Marketing and Branding
- Proposals
- Business development
- Geographic expansion
- Safety training
- Technical assistance
- Shared office space

Two SBA protégé firms

EA Engineering, Science and Technology, Inc. is a small business that provides site characterisation and remediation, natural resources, infrastructure resources, environmental H&S, information management & GIS.

KMEA is an 8(a) Small Disadvantaged, Service-Disabled Veteran-Owned Business that specialises in environmental services such as: natural resources, NEPA and CEQA environmental planning and permitting, air quality and water services, and project and business management services.
